- Single Sign on, User Provisioning, Identity Management, Privileged Account Management using Oracle Identity and Access Management
- Central management and monitoring using Oracle Enterprise Manager

Oracle E-Business Suite (EBS)

- Implementation services for Oracle EBS including:
 - Project Management
 - Technical Expertise
 - Functional Expertise
 - Training and Mentoring.
- End-to-End implementation expertise in EBS 11x and 12x application modules including:
 - Human Capital Management
 - In-Memory Applications
 - Financial Management
 - Supply Chain Management
 - Customer Relationship Management
 - Advanced Procurement
 - Service Management
 - Project Portfolio Management
 - Value Chain Planning and Execution
- Provide expertise throughout the project life cycle and we deliver services at any stage of the project including Installations, Applications DBA support, Functional and Technical requirements and gap analysis, Application Configurations, Technical Development (RICE), Deployment and Post-production support.
- EBS Upgrade Services - As a business, upgrading your Oracle E-Business Suite requires thorough planning, well-defined project scope and the right team. Our team fully understands Oracle EBS and the functional and technical considerations that are part of an upgrade project. We gather the existing footprint, perform a detailed analysis and provide an optimal upgrade path with minimal effect to the current business processes.
